UNDER THE AUSPICES

Welcome

Dear colleagues,

On behalf of the Organizing Committee, we are particularly pleased to invite you to participate in the 6th International Conference on Cardiology and Cardiac Surgery of the MITERA Pediatric Cardiology and Adult Congenital Heart Disease Dpt to be held 2-3 April 2022.

While for the second year in a row the pandemic has continued to affect the lives of us all and to attract the attention of the global medical community, progress on issues related to heart disease in children and congenital heart disease in adults continues.

The aim of our Conference, co-organized by the Pediatric Cardiology Clinic and the two Cardiac Surgery Clinics for Pediatric Cardiology and Adult Congenital Heart Disease of MITERA Hospital, is the information and the fruitful exchange of views on selected topics, where there have been important scientific developments.

In order to achieve this goal, distinguished colleagues who are active in Greece and in large centers abroad have been invited as speakers. The Conference is addressed to all those involved in the diagnosis and treatment of children with heart problems and adults with congenital heart disease, including Pediatricians, Cardiologists, Cardiac Surgeons, Anesthesiologists, Intensivists, Obstetricians-Gynecologists, Radiologists, cardiac nurses and technicians.

The success of the conference will depend on the active participation of all, participation which we seek and encourage, since the questions and the discussion are the ones that highlight the topics better.

We look forward to welcoming you all to the MITERA "N. LOUROS" Conference Center. The conference will be held in a hybrid way, so that those who will not be able to be with us in person can participate actively and interactively.

With best regards
