2021

WELCOME NOTE

Dear colleagues, dear friends,

It is a great pleasure to welcome you to the Advanced Shoulder Arthroplasty course.

Shoulder surgery has seen impressive developments over the last decade, especially in the use of reverse shoulder arthroplasty, since indications for RSA have increased significantly.

The scientific programme is structured to include lectures, case presentations, review of clinical outcomes, and also hands-on practice on cadaver specimens. The faculty consists of esteemed colleagues both from Greece and abroad

Our goal is to enrich our know-how in the field of shoulder surgery in general, with a specific focus on the applications of arthroplasty.

We look forward to fulfilling your expectations and boost your interest about shoulder surgery and reverse shoulder arthroplasty.
